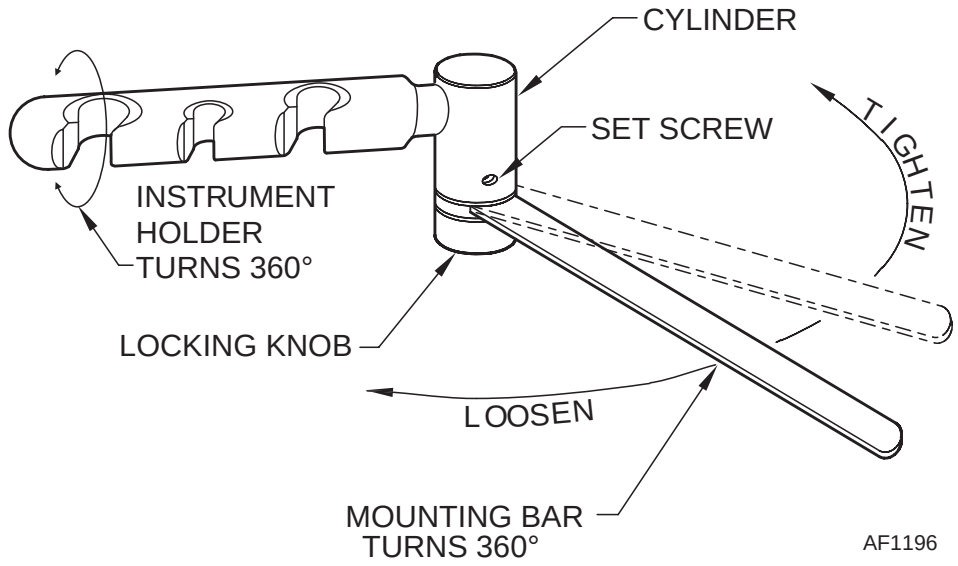
Print on plain white paper - Part # 122919

MOVABLE ASSISTANT'S INSTRUMENT HOLDER

The movable instrument holder can be inserted in the assistant's console or in either side of the headrest, for right or left-hand use. The holder is completely adjustable to allow for any positioning for the assistant's convenience.

As the DRAWING below shows, the instrument holder arm can be turned 360°; the mounting bar can also be turned 360°. Use the following instructions to adjust the instrument holder and mounting arms to desired position.

The tension on the mounting bar can be adjusted by loosening the #10-32 set screw on the cylinder and tightening/loosening the locking knob below the mounting bar. Retighten the #10-32 set screw after desired tension has been achieved.



MAINTENANCE

All surfaces may be cleaned using a mild solution of warm, soapy water.
We have tested the following disinfectant/cleaners and recommend their use.

CAVACIDE, distributed by E & D Dental Products, Inc.
TOP-CIDE, distributed by Upland Research

CAUTION: DO NOT USE ABRASIVE CLEANERS AS THEY WILL AFFECT SURFACE FINISHES.
